-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Steiner et al.

There is disclosed in Steiner a server for retaining and dispensing beverages, the server comprising: a housing 29; a reservoir 21 positioned in the housing for retaining a beverage; a heater 41 operatively associated with the server for transferring energy from the heater to a beverage retained in the reservoir, wherein the heater heats the air surrounding the reservoir which in turn provides a heating function to the reservoir; a controller 43 coupled to the heater for controlling operation of the heater; whereby the heater is operated before dispensing beverage to the reservoir (col. 2, lines 65-70, it states that the reservoir is at a temperature lower than coffee entering).

Response to Arguments

Applicant's arguments filed 01 October 2007 have been fully considered but they are not persuasive. Applicant argues that the passage provided by the examiner, as proof of pre-heating, if read to the end provides proof of the contrary. It merely provides information to define the range of practical temperatures at which coffee can be maintained. While reviewing the complete passage, it is still the opinion of the examiner

that the reservoir 21 is heated to one temperature by the heater 41 which is coupled to the reservoir by their association to the base. Thus, providing a pre-heating of the reservoir before entry of hot beverage thereto. While the heater is not directly connected to the heater, it can be considered coupled thereto since the two elements share a common base.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
